Art Unit: 1771

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thornton et al, U.S. Patent No. 5,244,716 in view of Reed et al, U.S. Patent No. 4,908,263. Thornton et al discloses a discontinuously bonded material comprising an imperforate, water vapor permeable, liquid impermeable film layer such as a polyurethane layer and a fabric. The two layers are discontinuously bonded so that the fabric layer will be flat while the film layer is pleated into a plurality of parallel pleats. See figure 3a where 105 refers to the film and 100 refers to the fabric. The film may comprise a polyurethane material and may have a WVTR which would meet the claimed limitations. See col. 13, lines 19-38. The layers are bonded when the film is an unstretched state. See col. 5, lines 23-35. Thornton et al differs from the claimed invention because Thornton et al does not disclose that the fabric layer may be an elastomeric polymer, although Thornton does teach employing thermoplastic polymers such as acrylic in the fabric layer. Reed et al teaches nonwoven, elastomeric melt blown fabrics may be used to form a variety

Serial Number: 09/941,096 Page 3

Art Unit: 1771

of garments including gloves. See col. 3, lines 10-25. Reed et al teaches that such fabrics have improved elasticity, flexibility and softness and also have improved launderability. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have employed melt blown elastomeric nonwoven fabrics such as those disclosed by Reed to form the fabric layer of Thornton. One of ordinary skill in the art would have been motivated to employ the meltblown elastomeric nonwoven of Reed because it is disclosed as having improved properties of softness, elasticity and flexibility which would have been desirable in the garments of Thornton et al. With regard to claim 6, while neither Thornton nor Reed disclose the bond sizes or the size of the pleats, Thornton teaches that bonding should be discontinuous. Therefore, it would have been obvious to have optimized the size of the bonds and thus the size of the pleats in order to form a composite fabric having the desired properties of insulation, softness, elasticity, etc.

- 3. Applicant's arguments with respect to claims 1-10 are have been considered but are moot in view of the new ground(s) of rejection.
- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Serial Number: 09/941,096 Page 4

Art Unit: 1771

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth M. Cole whose telephone number is (703) 308-0037. The examiner may be reached between 6:30 AM and 5:00 PM Monday through Thursday.

Mr. Terrel Morris, the examiner's supervisor, may be reached at (703) 308-2414.

Inquiries of a general nature may be directed to the Group Receptionist whose telephone number is (703) 308-0661.

The fax number for official faxes is (703) 872-9310. The fax number for official after final faxes is (703) 872-9311. The fax number for unofficial faxes is (703) 305-5436.
